**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. The application has been amended as follows:

In the specification, page 1, line 11 as numbered by applicant please insert --, now US Patent 6678583-- after "8/2/2003".

***Allowable Subject Matter***

2. Claims 1-9 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 6, and 9, the applicant's particular system and associated method comprising [a storage enclosure for storing objects comprising a plurality of shelves; a multi-axis robot mounted to the storage enclosure in an inverted orientation; at least one load port, whereby the robot transfers objects between the load port and the storage locations under control of the controller]... in combination with the other limitations of the claims, was not disclosed by, would not have been obvious over, nor would have been fairly suggested by the prior art of record.

The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.

The closest prior art, Parkinson et al (US 2002/0009457) disclose [a robot with similar features in an environment]. Parkinson et al does not disclose [a storage enclosure for storing objects comprising a plurality of shelves; a multi-axis robot mounted to the storage enclosure in an inverted orientation; at least one load port, whereby the robot transfers objects between the

Art Unit: 3663

load port and the storage locations under control of the controller]. Thus, the closest prior art fails to anticipate or render Applicant's limitations above obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following: US 2002/0009457, US 2002/0068992, US 2003/0113190 all disclose a robot.

### **Communication**

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronnie Mancho whose telephone number is 703-305-6318. The examiner can normally be reached on Mon-Thurs: 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Black can be reached on 703-305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-305-7687.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
